Built-in Gear / Rotary Actuator Type 5-phase Stepper Motor (42 mm, 60 mm, 85 mm)

AK-G / AK-R Series INSTRUCTION MANUAL

TCD210124AB

Autonics

Thank you for choosing our Autonics product.

Read and understand the instruction manual and manual thoroughly before using the product.

For your safety, read and follow the below safety considerations before using. For your safety, read and follow the considerations written in the instruction manual, other manuals and Autonics website.

Keep this instruction manual in a place where you can find easily.

The specifications, dimensions, etc. are subject to change without notice for product improvement. Some models may be discontinued without notice.

Follow Autonics website for the latest information.

Safety Considerations

- Observe all 'Safety Considerations' for safe and proper operation to avoid hazards.
- A symbol indicates caution due to special circumstances in which hazards may occur.

★ Warning Failure to follow instructions may result in serious injury or death.

- 01. Fail-safe device must be installed when using the unit with machinery that may cause serious injury or substantial economic loss. (e.g. nuclear power control, medical equipment, ships, vehicles, railways, aircraft, combustion apparatus, safety equipment, crime / disaster prevention devices, etc.)
- Failure to follow this instruction may result in personal injury, economic loss or fire.

 10. Do not use the unit in the place where flammable / explosive / corrosive gas, high humidity, direct sunlight, radiant heat, vibration, impact or salinity may be present. ction may result in explosion or fire
- 03. Do not use the brake for safety.

Failure to follow this instruction may result in personal injury or product and ambient

04. Fix the unit on the metal plate.

Failure to follow this instruction may result in personal injury or product and ambient

- 05. Do not connect, repair, or inspect the unit while connected to a power source.
- 06. Install the unit after considering counter plan against power failure.
- ilure to follow this instruction may result in personal injury, economic loss or fire
- 07. Check 'Connections' before wiring.
- 08. Do not disassemble or modify the unit.

re to follow this instruction may result in fire or electric shock.

- 09. Install the motor in the housing or ground it.
- ailure to follow this instruction may result in personal injury, fire or electronic shock. 10. Make sure to install covers on motor rotating components.
- 11. Do not touch the unit during or after operation for a while.
- ure to follow this instruction may result in burn due to high temperature of the surface.
- 12. Upon occurrence of an error, disconnect the power source ailure to follow this instruction may result in personal injury, fire or electronic shock.

- ▲ Caution Failure to follow instructions may result in injury or product damage.
- 01. Use the unit within the rated specifications.
- illure to follow this instruction may result in fire or product damage
- 02. Use a dry cloth to clean the unit, and do not use water or organic solvent.
- 03. The motor may overheat depending on the environment
- Install the unit at the well-ventilated environment and forced cooling with a cooling fan.
- 04. Keep the product away from metal chip, dust, and wire residue which flow into the unit. ilure to follow this instruction may result in fire or product damage

Cautions during Use

- Follow instructions in 'Cautions during Use'.
- Otherwise, it may cause unexpected accidents.
- · At low temperature, reducing the grease's consistency of ball-baring and etc. causes the
- Start the motor gradually since motor's torque is in normal state.

 The clack sound may occur when power is ON or OFF on brake.
- Release the brake before motor drive by supplying power on brake.
- The product life cycle is shorten and the static friction torque reduces due to worn out brake
- Be aware of backlash when positioning the motor in both CW/CCW directions Built-in gear type motor achieves low backlash due to high accuracy gear for positioning, but the problem may occur when positioning the motor in both CW/CCW directions In this case, the control is required to determine the position in either direction.

- Maintain and inspect regularly the following lists.
 - Unwinding bolts and connection parts for the unit installation and load connection
 - Abnormal sound from Ball-bearing of the unit - Damage and stress of lead cable of the unit
- Connection error with driver Inconsistency between the axis of motor output and the center, concentric (eccentric,
- declination) of the load, etc.
- · This unit may be used in the following environments.
- Indoors (in the environment condition rated in 'Specifications')
- Altitude max. 2,000 m
- Installation category II

Cautions during Installation

- Follow instructions in 'Safety Considerations' and 'Cautions during Use'. Otherwise, it may cause unexpected accidents.
- Install the motor in a place that meets the certain conditions specified below. It may cause product damage if it is used out of following conditions.

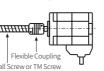

Inside of the housing which is installed indoors (This unit is designed/manufactured for the purpose of attaching to equipment. Install a ventilation device.)

- The place without contact with water, oil, or other liquid
- The place without contact with strong alkali or acidity The place with less electronic noise occurs by welding machine, motor, etc.
- The place where no radioactive substances and magnetic fields exist. It shall be no vacuum
- Motor can be installed horizontally and vertically. Refer to 'Shaft Allowable Load along Installation
- \bullet If a force (30 N) exceeding the specification is applied to the motor cable during installation, it may cause the contact failure and disconnection.
- If the excessive force or frequent cable movement is required, establish safety measures
- In consideration of heat dissipation and vibration prevention, mount the motor as tight as possible against a metal panel with high thermal conductivity such as iron or aluminum
- Refer to the product manual when mounting attachment on built-in rotary actuator motor.

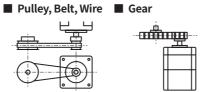

Cautions during Connection with Load (AK-G Series)

- Do not disassemble or modify the motor shaft to connect with the load.
- · Tighten the screw not to be unscrewed when connecting with load.
- · Refer to 'Shaft Allowable Load along Installation Direction' and take care of potential shock when connecting with load.
- · Connect the motor shaft and the load shaft to be parallel.
- If the center with the load is not aligned with the shaft, it may cause unexpected accidents such as severe vibration, shorten life cycle of the shaft bearing and shaft damage.
- · When attaching coupling or pulley with motor shaft, be aware of damage on motor shaft and shaft

■ Coupling

When connecting the load directly to the motor shaft. use a flexible coupling (ERB

Connect the motor shaft and the line which connects the center of two pulleys to be

Connect the motor shaft to the center of gear teeth to be interlocked.

Max. allowable torque	35 kgf cm (3.5 N m)	40 kgf cm (4.0 N m)	50 kgf cm (5.0 N m)	
Rotor inertia moment 01)	280×10 ⁻⁷ kg·m ²			
Rated current	1.4 A / Phase			
Basic step angle	0.144° / 0.072° (Full / Half step)	0.1° / 0.05° (Full / Half step)	0.072° / 0.036° (Full / Half step)	
Allowable speed range	0 to 360 rpm	0 to 250 rpm	0 to 180 rpm	
Backlash	± 20' (0.33°)			
Unit weight	Built-in gear type: ≈ 1.30 kg (≈ 1.57 kg) Built-in rotary actuator type: ≈ 1.30 kg (≈ 1.40 kg)			
(packaged) 02)	Built-in gear type: ≈ 1.57 kg (≈ 1.65 kg) Built-in rotary actuator type: ≈ 1.60 kg (≈ 1.70 kg)			

Model	A140K-□599□-□□5	A200K-□599□- □ 7.2	A200K-□599□- □ 10		
Max. allowable torque	140 kgf cm (14.0 N m)	200 kgf cm (20.0 N m)			
Rotor inertia moment 01)	2,700×10 ⁻⁷ kg · m ²				
Rated current	M: 1.4 A / Phase G: 2.8 A / Phase				
Basic step angle	0.144° / 0.072° (Full / Half step)	0.1° / 0.05° (Full / Half step)	0.072° / 0.036° (Full / Half step)		
Allowable speed range	0 to 360 rpm	0 to 250 rpm	0 to 180 rpm		
Backlash	± 15' (0.25°)				
Unit weight	≈ 4.40 kg (≈ 4.88 kg)				
(packaged) 01)	\approx 5.20 kg (\approx 5.50 kg)				
01) Linkad in audas of Standard type					

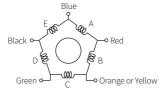

01) Listed in order of Built-in brake type

balle in brake type				
Motor phase	5-phase			
Insulation class	B type (130°C)			
Insulation resistance	Between the charging part and the case: $\geq 100~\text{M}\Omega$ (500 VDC= megger)			
Dielectric strength 01)	Between the charging part and the case: 1,000 VAC $\sim 50/60$ Hz for 1 minute			
Temperature rise 02)	≤ 80°C (5-phase excitation for rated current, while stop)			
Ambient temp.	-10 to 50°C, storage: -25 to 85°C (no freezing or condensation)			
Ambient humi.	35 to 85%RH, storage: 35 to 85%RH (no freezing or condensation)			
Protection rating	IP30 (IEC34-5 standard)			
Certification	C€ FR ENI			
Stop angle error 02)	± 3' (± 0.05°) (Full step, no load)			
Absolute position error 03)	± 20' (± 0.33°)			
Lost motion 03)	± 20' (± 0.33°)			
Shaft vibration	0.05 mm T.I.R.			
Radial movement 04)	≤ 0.025 mm T.I.R.			
Axial movement 05)	≤ 0.075 mm T.I.R.			
Shaft concentricity	0.075 mm T.I.R.			
Shaft perpendicularity	0.075 mm TTR			

- 01) In case of rated current: 0.75 A / Phase, Between motor coil and case: 500 VAC ~ 50 / 60 Hz for 1 minute
- 02) The corresponding value is only available in built-in gear type
- 03) The corresponding value is only available in built-in rotary actuator type
- 04) Amount of radial shaft displacement when applying radial load (5 N) to the end of the shaft. 05) Amount of axial shaft displacement when applying axial load (10 N) to the shaft

Built-in brake type Frame size	□ 42 mm □ 60 mm		□ 85 mm	
Rated excitation voltage	24 VDC= ±10%			
Rated excitation current	0.2 A	0.33 A	0.62 A	
Static friction torque	≥ 0.18 N m	≥ 0.8 N m	≥ 4.0 N m	
Rotation part inertia moment	3×10 ⁻⁷ kg · m²	29×10 ⁻⁷ kg · m ²	153×10⁻⁻ kg ⋅ m²	
Insulation class	B type (130°C)			
B type brake	Brake is released when power ON, brake is locked when power OFF			
Operating time	≤ 25 ms	≤ 25 ms	≤ 60 ms	
Releasing time	≤ 15 ms	≤ 20 ms	≤ 15 ms
